“non solo stadio...
la mia idea di stadio
si rifà all'agorà,
un luogo di aggregazione
e di cultura.

La partita dura due ore,
ma queste strutture
potrebbero vivere ogni giorno,
per tutto l'anno!”

Architetto Gino Zavanella

CHIEF ARCHITECT AND FOUNDER

ARCH. GINO ZAVANELLA

He has always been interested in the architecture of sport, also driven by a strong passion that led him to win an Offshore World Title.

He has always supported the need for a radical renewal of the Italian stadium park, opting, first and foremost, for their privatization.

Only with a choice so strong you can reach a cozy stadium, multifunctional and used all week. Over the course of his decades-long profession, he signs projects of international standing.

- FACILITIES MANAGEMENT

Prepare the city to
welcome a structure
that needs sustainable
mobility and parking

Insert a container, which is
certainly the largest in the city,
which on the match day must be
able to load and unload as
quickly as possible

Start urban regeneration process:
find those functions that allow everyone to
use these architectures 7 days a week
